EDUCATION

06 2004

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE, HØGSKOLEN I VESTFOLD

Specialized in optimization, advanced algorithms and mathematics.

SKILLS

- Several years of experience as product owner maintaining and coordinating backlog, leading development teams accordingly and working as the interface between business and development.
- Several years of experience as architect with distributed API driven microservices (both services and serverless) architecture on the Amazon cloud AWS.
- Participated in making Bluestone PIM accepted in MACH Alliance.
- 10+ years of experience cooperating with development teams across the world. Poland and Thailand
- 10+ years of experience working in the intersection between business requirements and implementation specifications

ACTIVITIES

I spend a lot of time outdoors, also hunting and fishing. Typical Norwegian “life in the wilderness”. This is what’s charging my batteries.

This is also a link with my sport, climbing. I am heavily involved and leader of the local group DNT Fjellsport Tønsberg og Omegn.

I’m easily getting involved in different projects and in the latest one I ended up taking lead on financing and building a new sports court at Sandeåsen skole, ended up being more than a 1M KR project.
